

NOTIFICATION

(ASWATH)

1.BLOG

- When a blog draft is ready, the admin is notified immediately.

Notification type: Mail + In-App + WhatsApp (Admin)

Sample:

- In-App: “Blog draft *{Blog Title}* is ready for review.”
- Mail: “Draft Ready: *{Blog Title}* is available for approval.”
- WhatsApp: “Blog Draft Ready: *{Blog Title}* is ready for admin review.”

- When a blog is regenerated or scheduled time is updated, the admin is informed.

Notification type: In-App (Admin)

Sample:

- “Blog *{Blog Title}* has been regenerated.”
- “Publishing time updated for *{Blog Title}*.”

- When a new blog is published, both users and admin are notified.

Notification type: In-App + Mail (Users & Admin)

Sample:

- In-App: “New blog published: *{Blog Title}*. Read now.”
- Mail: “New Blog Live: *{Blog Title}* is now available.”

- When a blog category receives the highest views, the admin is notified for content insights.

Notification type: In-App + Mail (Admin)

Sample:

- In-App: “*{Category Name}* is the most viewed blog category this period.”
- Mail: “Top Blog Category Alert: *{Category Name}* has the highest engagement.”

2.BASIC EVENTS

- A small notification is shown when the user creates a new portfolio, only to confirm creation without interrupting the flow.
(In-App – low priority)
- A reminder notification is triggered when the user stops entering details in between and leaves the flow incomplete, prompting them to continue later.
(In-App – delayed)
- A notification is shown when the user logs in or logs out to indicate account activity and improve security awareness.
(In-App / Mail – security related)
- A notification is triggered when important account or preference settings are changed, ensuring transparency and security.
(In-App / Mail – security related)
- A notification is triggered when a portfolio has no activity or review for a long period, prompting the user to revisit it. *(In-App – low frequency)*
- A notification is shown when the system detects unusual behavior or abnormal activity in portfolio performance compared to normal trends. *(In-App – insight based)*
