

NOTIFICATION :- (PAVATHARINI K)

1. EQUITY DASHBOARD

→ When a new portfolio is created, a notification is triggered with basic portfolio details.

Notification type: In-App + Mail

Sample:

- In-App: "Portfolio {Portfolio Name} has been created successfully."
- Mail: "Your equity portfolio {Portfolio Name} was created on {Date}. Start tracking your investments."

→ When equity analysis completes after the user navigates away from the page, the user receives a completion alert.

Notification type: In-App

Sample:

- "Equity analysis for {Portfolio Name} is complete. Tap to view results."

→ Inside the equity research report section, when the user views a particular company report, a small notification is shown indicating the company was accessed.

Notification type: In-App

Sample:

- "You viewed {Company Name} equity research report."

→ If there is any new update or revision in equity research reports, the user is informed immediately.

Notification type: In-App + WhatsApp

Sample:

- In-App: "New update available for {Company Name} equity report."
- WhatsApp: " Equity Update: {Company Name} research report has been updated."

2. MUTUAL FUNDS DASHBOARD

→ When the user completes SIP setup or confirms SIP details, a confirmation notification is generated.

Notification type: In-App + Mail

Sample:

- In-App: “Your SIP for {Fund Name} has been set successfully.”
- Mail: “SIP Confirmed: ₹{Amount} invested in {Fund Name} starting from {Start Date}.”

→ For each step of investment flow such as future projection calculation, invested amount, and nominal value, step-wise notifications are shown.

Notification type: In-App

Sample:

- “Future value calculated based on your selected investment period.”
- “Total invested amount and nominal value have been updated.”

→ If the user customizes SIP details such as amount, tenure, or fund selection, updated information is reflected through a notification.

Notification type: In-App

Sample:

- “Your SIP changes have been applied. Updated projections are now available.”

3. WATCHLIST

→ When a company is added to the watchlist, confirmation and breakdown monitoring alerts are enabled.

Notification type: In-App

Sample:

- “{Company Name} added to your watchlist.”

→ If a company is removed from the watchlist, a simple confirmation notification is shown.

Notification type: In-App

Sample:

- “{Company Name} removed from your watchlist.”

→ When a watchlisted stock enters Profit-Taking Zone, Stability Zone, or crosses Trendline Boundaries, an alert is triggered.

Notification type: In-App + WhatsApp

Sample:

- In-App: “Alert: {Company Name} has entered the {Zone Name}.”
- WhatsApp: “ Stock Alert: {Company Name} crossed key technical levels.”

→Daily summary updates are sent for saved watchlist companies to help monitor performance.

Notification type: WhatsApp / Mail

Sample:

- “ Daily Watchlist Update: {Company Name} is near Profit-Taking / Stability / Trendline Boundary zone.”
